Education

From research into the use of ICT in learning, bilingual education and students with challenging behaviour to services for children who have experienced emergency situations, Macquarie’s education researchers are uniquely positioned to help shape the complex issues that define the future of humanity.

Macquarie is recognised internationally as a leader in early childhood, primary, secondary and higher education; educational leadership; special and inclusive education; and technology-based learning and teaching.

The Department of Educational Studies engages in collaborative activities with expert researchers and practitioners recognised both here in Australia and internationally. Our researchers have established relationships across early years centres and services, in education sectors, and with industry partners who are interested in advancing learning across education and community settings.

Macquarie is home to Fellows of the Academy of the Social Sciences in Australia, nationally competitive Research Fellows, an Order of Australia recipient, and several Early Career Researcher Award winners. Our researchers also enjoy an international reputation as leaders in their fields. In the most recent Excellence in Research for Australia evaluation, our research in education systems and specialist studies in education received a rating of ‘performance at world standard’.

We offer opportunities to participate in cross-disciplinary and collaborative research that focuses on innovation and change in early childhood and education environments. As a higher degree research candidate at Macquarie, you’ll have access to one of the finest research environments in our region.

OUR RESEARCH PRIORITIES
We pursue excellence in a broad range of research areas. Our five interdisciplinary strategic research priorities – Healthy People, Resilient Societies, Prosperous Economies, Secure Planet and Innovative Technologies – respond to globally significant challenges and opportunities to improve the lives of millions. Together, these research priorities provide a focal point for research, with discoveries made under these priorities translating into real improvements in the lives of local, national and global communities.

JOINTLY SUPERVISED PHD PROGRAMS
Macquarie actively encourages cotutelles and joint degrees – shared supervision arrangements with universities whose research activity strongly aligns with ours. Under each model, you are enrolled at two universities with a principal supervisor at each and may be eligible for additional scholarship support.
