CS4HS - Evaluations Summary (AU/NZ, 2017)

This document contains links and procedures for the CS4HS AU/NZ 2017 evaluations.

A Note to Awardees

The CS4HS team is very happy to welcome you to another funding cycle! We can’t thank you enough for your hard work, dedication, and the impact you have on the CS education landscape.

Evaluations

The data requested in these surveys are critical to the future of the CS4HS program, and we trust that you will communicate that importance to your participants and colleagues. If you’d like to share this with your workshop attendees, we’ve prepared a statement that you may like to use that discusses why we ask for their responses:

The CS4HS team is happy to welcome you to a network of CS educators, researchers, and PD practitioners who are passionate about creating and sharing best practices in CS education! During the course of your program, your CS4HS PD Provider will provide you with two surveys from the CS4HS team. These surveys aim to understand:

- The unique set of circumstances in which you operate as an educator, like your background and characteristics of your local education community;
- What you hope to gain from a CS4HS PD opportunity, and what you do and don’t gain by the end of your program;
- Your motivations for participating in a CS4HS-sponsored PD opportunity, and what you gain as a result.

Your responses are critical - not only to prove to Google that CS4HS is a valuable initiative that should continue to receive resources, but also to directly shape the future of CS4HS. Google aims to provide new resources, support, and directions for the program year-over-year, but the goal is to ensure that those additions and changes reflect the needs of all educators CS4HS serves.

Surveys are conducted by Google and all survey responses are maintained in accordance with Google’s Privacy Policy (http://www.google.com/policies/privacy/). Please read the survey introductions to learn more, and if you have any questions please reach out to Google at CS4HS@google.com. Thank you in advance for your genuine responses, we hope that you enjoy your CS4HS experience!

A CS4HS team member is happy to meet with you and your participants via Google Hangout to answer any questions they might have about the surveys.

Below are the links and procedures for each evaluation of the 2017 CS4HS cycle. A few notes on distribution:

- You will receive reminder emails to distribute the Participant Surveys at the beginning and endpoints of your program that you provided in the Program Details Form.
- We highly recommend that you distribute the Participant Surveys during your meetings and reserve 10-20 minutes for your teachers to complete them.

Participant Pre-Learning Survey ([LINK](LINK))

This survey is intended to be distributed to your teacher participants as early as possible - before any structured activities your CS4HS program will provide. If distributing after your activities have begun, request that teachers complete the survey as if they did not have any of knowledge they’ve gained in your program.

Participant Post-Learning Survey ([LINK](LINK))

This survey is intended to be completed after all of your structured activities have ended OR by February 1, 2018.
