The Macquarie Data Science Student Challenge is part of a global series of Hackathons. These events are designed to ignite a passion for the amazing things made possible by Data Science and to help students develop the skills necessary to harness the power of analytics. A variety of learning resources will be made available and the hackathon will suit students with a background in Computer Science, Data Science, Engineering, Statistics, Analytics and Math. This event is open to all university students in Sydney, participants typically work in teams of 3-4. If you have any questions, please email info@dsschack.com
