Aged care

Publications

Antipsychotics over use

New research shows that many people with dementia living in residential aged care facilities are being treated with antipsychotic medication for an average of twice as long as the recommended maximum time, increasing the risk of stroke. [Read more.](#)

Is our health system prepared?

Professor Jeffrey Braithwaite shared with ABC Radio National's The Health Report on how well the Australian health system is prepared to cope with increasing rates of chronic illness. [Read more.](#)

Informatics reform aged care

Professor Johanna Westbrook wrote in [Croakey.org](#) about the potential for informatics to effectively and quickly improve aged care services. [Read more.](#)

Event

The Australian Alliance for Artificial Intelligence in Healthcare (AAiH), led by the Australian Institute of Health Innovation, will be presenting at AIMed Australia, showcasing the transformative impact that AI-inspired technology is having on healthcare. We invite you to join us.

Free Breakfast Briefing: 16 Aug 2019 [Register here](#)
Summit: 12-13 Nov 2019 [Register here](#)

Publications of interest

- Reflections from health systems researchers on nursing practices in dementia care
- Prevalence of medication errors among paediatric inpatients: systematic review and meta-analysis
- Assessing the appropriateness of the management of otitis media in Australia: A population-based sample survey
- CareTrack Aged: the appropriateness of care delivered to Australians living in residential aged care facilities: a study protocol

The **Australian Institute of Health Innovation (AIHI)** at Macquarie University conducts world-class research with national and international research communities, governments, policymakers, providers of health services, managers, clinicians, patients and the community. Our work underpins health reforms and systems improvement, providing new tools, perspectives and evidence to help stakeholders who are interested in making the health system more effective, efficient and productive. Our overarching aim is to produce new, high quality research evidence to support change, prevention and improvement.
