

MACQUARIE
University

MQ Photonics Research Centre Seminar

Wednesday, 4 August 2021, 2:00 pm
(Online via the zoom link below)

MQ Photonics Town Hall

Director Prof. Judith Dawes

MQ Photonics Research Centre, Macquarie University

Abstract:

I will give a short report on our activities this year, and our plans for the remainder of the year. I will report on our recent Industry Advisory Board meeting. Although we were expecting to apply for a Centre renewal later this year, I have been advised that we will have an automatic renewal for a year due to COVID. This means that we have another year on our existing grant to consolidate our achievements. I would like to invite discussion and suggestions for how we can improve MQ Photonics for the future (especially during lockdown!).

All members of the Centre are invited to join us on Zoom.

Speaker biography:

Prof Judith Dawes is Director of MQ Photonics, and Professor in Physics, Macquarie University. With a background in solid-state lasers and laser applications in medicine, she researches the emission and control of light at the nanoscale for sensing applications. She is Treasurer of Science and Technology Australia, and former President of the Australian Optical Society. She is a Fellow of SPIE, OSA and the Royal Society of NSW.
