2SER community station is jointly owned by Macquarie University and the University of Technology Sydney. We are committed to social change, access and diversity; and our programs aim to stimulate learning as well as educate our listeners.

While 2SER is a Sydney-based station, getting involved with the My Town podcast project really fulfilled two clear mandates for us.

The first was EDUCATION, it's what we're about!

2SER = Sydney Educational Radio

At 2SER we always want to learn more about the opportunities and challenges of higher education for everyone studying in Australia.

Secondly, it's about GIVING A VOICE to those who don't always have one in the mainstream conversation. Students and other individuals from regional, rural and remote areas outside the 'Sydney Bubble' have experiences and observations that can really help us gain a new perspective, and those were really fascinating to hear on this podcast.

Sean,
Macquarie Coordinator
2SER
