1. OVERVIEW
The Macquarie University Co-Funding Scheme provides Deputy Vice-Chancellor Research support as part of Macquarie’s contribution towards competitive research funding proposals to schemes that stipulate a requirement for institutional cash co-investment.

Applications must be developed in consultation with, and approved by, the relevant Deputy Dean of Research and Innovation and should include a significant cash contribution (at least $10,000) to the initiative from the relevant Faculty and/or Department.

2. ELIGIBILITY
These guidelines do not apply to co-funding for the following major initiatives which will be managed through specific calls for expressions of interest at appropriate times:

- Bids for Cooperative Research Centers
- Bids for Centers of Excellence
- Linkage — Infrastructure, Equipment and Facilities (LIEF) proposals
- Laureate Fellowships.

Many other fellowship schemes, including ARC schemes – Future Fellowships, DECRAs – and NHMRC schemes – Investigator, Ideas – are funded at previously agreed amounts. Please consult Research Services for ARC, NHMRC, and MRFF schemes.

3. APPLICATION PROCESS
The MQ Co-Funding ServiceNow online form must be completed at least 1 month before the external funding body deadline, in order to enable appropriate DVCR consideration.

Direct approaches to the Deputy Vice Chancellor Research (DVCR) will be referred back to the Faculty.

If you wish to submit a Co-Funding application within one month of the external deadline, please approach your Deputy Dean of Research and Innovation.

Generally, decisions will be provided within 2 weeks. Decisions will be sent to applicants, with a copy to the Faculty Research Manager.

4. APPLICATION PREPARATION
Requests should include a significant cash contribution (at least $10,000) from the relevant Faculty and/or Department.

Requests must be developed in consultation with and approved by the relevant Deputy Dean of Research and Innovation.

5. BUDGET
The value of co-funding awarded depends on the value of external funds expected to be awarded to Macquarie. The ratio of the level of co-funding provided by the DVCR to the request from the
external funding body will generally be no more than 1:4 (i.e., 20% of the total funding). Where the co-funding has major strategic value, the ratio may be increased to 1:3 (i.e., 25% of the total funding). Specific schemes may have requirements that demand minimum amounts of co-funding; these will be dealt with on a scheme-by-scheme basis.

5.1. ELIGIBLE EXPENDITURE

The DVCR will contribute co-funding where the potential benefit to the University can be demonstrated to warrant the investment, particularly in developing new partnerships and funding sources.

The DVCR will consider providing funding for well-justified requests for items such as salary gaps associated with prestigious fellowships, a proportion of project-specific costs, and a contribution towards the purchase of essential equipment (note that large equipment should be funded through dedicated infrastructure schemes such as LIEF).

5.2. INELIGIBLE EXPENDITURE

The Co-Funding Scheme does not provide support for general or ‘routine’ project costs – these must be covered by the Department or Faculty. Typical examples of routine costs include office computers and software, travel to conferences and conference registration fees, publication charges, access or maintenance charges for local equipment, and Departmental bench fees.

The requesting of MQ funded HDR scholarships should not be included within co-funding requests. Applications for scholarships – where the requirements are met – must be sought through the Graduate Research Academy (gr.funding@mq.edu.au).

6. ASSESSMENT

The DVCR will assess and approve requests on the basis of:

- the importance of the contribution for eligibility and/or success of the proposal
- the importance of the contribution for success of the project
- the contribution of the project to research at Macquarie, including:
  - future funding opportunities,
  - research outputs including publications and/or creative works, and
  - collaborative links and partnerships
- alignment of the project with Department and/or Faculty priorities as indicated by, among other things, cash, or in-kind contributions from the Department and/or Faculty.

7. CONDITIONS OF AWARD

Future internal funding from any Macquarie internal research funding scheme is conditional on meeting the reporting obligations associated with any co-funding provided by DVCR.

In acceding to a request for Co-Funding, the DVCR, at their discretion, may fund a lower level than requested, may fund only certain items and/or may stipulate other conditions for the award.

The amount of co-funding and any conditions of the award will be contained in the letter of offer to the applicant.
If the funding awarded by an external funding body is less than the request to the funding body, the Co-Funding contribution from the DVCR may be reduced pro-rata.

**8. PRIVACY POLICY**

The conduct of research projects supported under all internal Macquarie University Schemes is subject to the provisions of the Commonwealth Government’s National Privacy Principles and other statutory provisions relating to ethics and biosafety. As part of the assessment process, Research Services may provide the Assessment Panel with its record of the details of the applicant’s funding and publications history. This action is consistent with the provisions of the National Privacy Principles.

**9. ETHICS AND OTHER APPROVALS**

Macquarie University maintains strict control over all research activities involving human or animal subjects and work in which issues of biosafety are involved. Such research must meet the ethical and safety requirements of the relevant government legislation and guidelines and satisfy the guidelines of external funding agencies such as the National Health and Medical Research Council (NHMRC). Where the proposed research requires ethics, biosafety or other approvals, the grantee must not commence that portion of the research until the necessary clearances have been obtained.

**9.1. UNIVERSITY HUMAN ETHICS, ANIMAL ETHICS, BIOSAFETY AND EXPORT CONTROLS COMMITTEES**

Researchers should consult the Human Research Ethics Committee, Animal Ethics Committee, Biosafety Committee, and Defense Trade Controls webpages to determine whether their research is subject to the respective guidelines and review processes.

If the proposed research requires human ethics, animal ethics, biosafety and/or export controls approval, the grant will not commence until approval has been obtained. Please contact the Ethics Secretariat (Human Ethics, Animal Ethics), Biosafety Secretariat, Gene Technology & Biosafety Secretariat and the Export Controls Secretariat for further information.

**9.2. RESEARCH INTEGRITY**

Researchers are expected to be scrupulous in avoiding conflicts of interest (especially where commercial issues are involved) when engaged in the peer review process. In addition, by encouraging public scrutiny of research results by publication and other means, the University also wishes to help combat fraud and misconduct.

All researchers, research coordinators and supervisors of postgraduate students should be familiar with the Australian Code for the Responsible Conduct of Research, and relevant external and internal ethical guidelines. These conditions include compliance with the Macquarie University Code for the Responsible Conduct of Research.

**10. FACULTY RESEARCH MANAGERS**
