

Turn off before take off!

Turn off all lights

Unplug all office equipment - computers/monitors/printers/speakers/televisions/fans/mobile phone chargers and power supplies for laptops.

Unplug all kitchen equipment too - kettles/coffee machines/microwaves/toasters/sandwich makers etc

Consult with your supervisor or Macquarie Property if you are not sure about switching off certain devices such as specialised equipment.

Did you know?

Unplugging equipment is preferable to turning it off as most electronic equipment continues to use power even when turned off. This is known as 'standby' power and makes up 10% of energy consumption!
