Professor Jeffrey Braithwaite Bio

Professor Jeffrey Braithwaite

Founding Director, Australian Institute of Health Innovation

Director, Centre for Healthcare Resilience and Implementation Science

Professor of Health Systems Research, Macquarie University

Immediate Past President, International Society for Quality in Health Care

E: jeffrey.braithwaite@mq.edu.au

Professor Jeffrey Braithwaite is a leading health services and systems researcher with an international reputation for his work investigating and contributing to systems improvement. He is visiting or adjunct Professor at Newcastle University and University of Birmingham in the UK; University of Southern Denmark; University of Stavanger, Norway; University of New South Wales; and Honorary Senior International Research Fellow at the Canon Institute for Global Studies in Tokyo, Japan. He is the Immediate Past President of the International Society for Quality in Health Care (ISQua), where he was President between 2020 to 2024. He has considerable expertise in researching the culture and structure of acute settings, leadership, management and change in health sector organisations, quality and safety in healthcare, accreditation and surveying processes in international context and the restructuring of health services, working with 152 countries.

Professor Braithwaite has published extensively about organisational, social and team approaches to care (over 900 refereed contributions and 1,550 publications) with more than 39,980 citations. He has presented at or chaired international and national conferences, workshops, symposia and meetings on more than 1,531 occasions, including over 150 keynote addresses. Theories and ideas he has shaped or devised are now in common use; for example, multi-method, triangulated approaches to research, the boundary-less hospital, accreditation models in general practice and beyond, clinician-managers as key players in reform initiatives, fundamental principles for the governance of health systems, diversity in clinical professional groups, and inter-professional learning and culture change as a more sustainable strategy for reform. His empirical results have exposed the distinctive attitudes of clinical professional groups, how clinician-managers enact their leadership responsibilities, the behavioural displays of clinicians in service structures and the status of system-wide patient safety improvement initiatives.

Accreditation

Macquarie University is a vibrant hub of intellectual thinkers, all working towards a brighter future for our communities and our planet.

A PLACE OF INSPIRATION

Macquarie is uniquely located in the heart of Australia's largest high-tech precinct, a thriving locale which is predicted to double in size in the next 20 years to become the fourth largest CBD in Australia.

Our campus spans 126 hectares, with open green space that gives our community the freedom to think and grow. We are home to fantastic facilities with excellent transport links to the city and suburbs, supported by an on-campus train station.

RENOWNED FOR EXCELLENCE

We are ranked among the top two per cent of universities in the world, and with a 5-star QS rating, we are renowned for producing graduates that are among the most sought after professionals in the world.

A PROUD TRADITION OF DISCOVERY

Our enviable research efforts are brought to life by renowned researchers whose audacious solutions to issues of global significance are benefiting the world we live in.

BUILDING SUCCESSFUL GRADUATES

Our pioneering approach to teaching and learning is built around a connected learning community: our students are considered partners and co-creators in their learning experience.
